Chair's message

It is with pleasure I introduce the Vision 2020 Australia 2017-2018 Annual Report – an important record of another positive year for the organisation. I can confidently report Vision 2020 Australia remains a vital and financially stable organisation which continues to work in partnership with members towards our vision of eliminating avoidable blindness and the full participation of people who are blind or vision impaired in the community.

The year saw a change in the position of Chief Executive Officer, with the appointment of Judith Abbott in June 2018. Initially commencing as interim CEO, it soon became clear that her combination of skills, experience, and strategic insight are great for our organisation. I also wish to recognise the hard work and dedication of Carla Northam, who oversaw the work of Vision 2020 Australia for the previous two years, and was CEO for most of the period covered by this report.

Our strength lies in our membership from across the entire sector coming together to work on issues of common interest, and speak with a united voice. We very much value the contributions made by members, and on behalf of the Board, I extend my thanks to you all – particularly those who participate in committees, working groups, and other activities.

Thanks also to our major supporters – Brien Holden Vision Institute Foundation, The Fred Hollows Foundation, Novartis Pharmaceutical, CBM Australia, Optometry Australia, and the Royal Australian and New Zealand College of Ophthalmologists – whose financial and in-kind support has remained instrumental to our organisation.

Vision 2020 Australia continues to benefit from the consistent support of an engaged and energetic Board. I would like to express my personal gratitude to all Board Directors who contribute their passion and expertise.

During the year we saw some changes to the Board, with three new Directors appointed at November's Annual General Meeting: Ms Jaki Adams-Barton, Dr David Andrews, and Ms Megan McAlpine, all of whom have been strong contributors to the Board.

We also said farewell to departing Board members Professor Hugh Taylor AC, Ms Amanda Davis and Ms Jane Edge. We thank them for their remarkable contributions to our organisation, knowing they will continue to play important roles as member CEOs.

Looking ahead, we are focussed on strengthening our member engagement, working with members to chart our future course, and continuing to enhance the way we work with and support collective effort and a unified sector voice.

**The Hon
Amanda Vanstone**
Chair

CEO's message

As the incoming CEO, I am pleased to endorse this annual report for the previous reporting period. I join Vision 2020 Australia at an exciting time for the organisation and see many opportunities ahead of us.

It has been fantastic to meet many members and talk about how Vision 2020 Australia can best strengthen its efforts across the four foundations of the organisation: advocacy, collaboration, awareness, and evidence.

I am honoured to have the opportunity to lead Vision 2020 Australia into a new year and beyond, and look forward to working with our members, our many parliamentary friends, and other like-minded organisations to ensure that eye health, vision care, and the full participation of people who are blind or vision impaired in the community are always a priority on Australia's health agenda.

Judith Abbott
Chief Executive Officer

Board of Directors

**The Hon
Amanda Vanstone**

Chair

Qualifications: BA; LLB;
GradDipLegalPrac; CertMktg

Experience: Chair, Royal Flying Doctor Australia; Board Member, Drinkwise Australia; Board Member, Port Adelaide Football Club; Board Member, Governors of the Institute for International Trade; Chair, Samstag Museum Advisory Board; Member, Adelaide Festival Board; Member of the National Commission of Audit in 2013-14; former Legal practitioner; former Senator for South Australia; former Minister, Australian Government; former Australian Ambassador to Italy and San Marino; former Australian Representative, UN Food and Agriculture Organisation; former Australian Representative, UN World Food Program.

Qualifications: BSc (Hons); MBA; DipEd; GAICD, WCLP

Experience: CEO and Board Member, Australian College of Optometry/ National Vision Research Institute; Board Member, ARC Centre of Excellence in Convergent Bio-Nano Science and Technology; Member, Ministerial (Health) Clinical Trial Research Consultative Council; Deputy Chair, BioMelbourne Network.

Our vision

Our vision is the elimination of avoidable blindness and vision loss and the full participation of people who are blind or vision impaired in the community.

About us

Vision 2020 Australia is the national peak body working in partnership to prevent avoidable blindness and improve vision care in Australia and our region. We represent around 45 member organisations involved in local and global eye health and vision care, health promotion, low vision support, vision rehabilitation, eye research, professional assistance and community support.

The four foundations of our approach

Advocacy

Influencing policy change on behalf of the eye health and vision care sector, presenting a united voice to the Australian Government and other policy makers to improve eye health and vision care outcomes.

Awareness

Facilitating access to the latest information and research to build awareness of eye health and vision care among the Australian Government, policy makers, the community and other relevant stakeholders.

Collaboration

Partnering with members and developing relationships with other relevant stakeholders to identify and successfully achieve eye health and vision care priorities.

Evidence

Building a strong evidence base is critical to identify service delivery gaps, support effective policy development and strengthen the sustainability of the eye health and vision care sector.

The Vision Initiative and Vision 2020 Australia were highlighted in Australia's first review on the Sustainable Development Goals in a report delivered to the United Nations in June 2018.

Vision Initiative

The Vision Initiative is an integrated eye health promotion program that aims to prevent avoidable blindness and vision loss in the Victorian community. Funded by the Victorian Government and managed by Vision 2020 Australia, the initiative is the government's public health response to the *National Framework for Action to Promote Eye Health and Prevent Avoidable Blindness and Vision Loss*.

The Vision Initiative delivers activity to promote the importance of regular eye tests to people at risk of eye disease through three tiers, targeting health providers, community and local media. In July 2017, the Vision Initiative started work in six new local government areas (LGAs): Bass Coast, Central Goldfields, Glenelg, Hepburn, Moira and Whittlesea. This brings to 14 the total number of local areas where the program has been implemented since 2012.

2017-2018 highlights:

- On 3 October 2017, the Victorian Parliamentary Secretary for Health, Gabrielle Williams launched the Vision Initiative's 2017-2019 LGAs: Bass Coast, Central Goldfields, Glenelg, Hepburn, Moira and Whittlesea.
- The Vision Initiative has been integrated in the Municipal Public Health and Wellbeing Plan developed by councils in Bass Coast, Glenelg and Moira.
- More than 560 primary health professionals completed Vision Initiative web-based training opportunities on eye health and vision care.
- More than 100 health and aged care professionals attended face-to-face training sessions on eye health and low vision care organised in Bass Coast, Moira and Whittlesea.
- Ahead of the engagement with GP and pharmacy practices located in the new project areas, the Vision Initiative team produced a refreshed and updated version of the Eye Health Kit and online training modules for GPs, practice nurses and pharmacists.
- Meetings with staff from more than 70 GP, pharmacy and optometry practices to provide them with an Eye Health Kit, and introduce them to the program and planned local activities. These visits were also an opportunity to discuss with GPs and pharmacists ways eye health messages can be embedded in their day-to-day work.

Drawing on the knowledge, expertise, and resources of our members, the Committees are central to supporting Vision 2020 Australia's key role in providing cohesive advice to Government, offering a unified and consistent voice.

Policy committees

Eliminating avoidable blindness

The Prevention and Early Intervention Committee advocates for the elimination of avoidable blindness and vision loss in Australia through prevention, early detection and intervention, and improved awareness.

Highlights

- Continued advocacy for investment in an Australian Diabetes Blindness Prevention Initiative, reflecting the key importance of early detection and intervention in preventing avoidable vision loss and blindness among people with diabetes.
- Continued advocacy for expansion of Australian Government funding of retinal cameras and training to support early detection of diabetic retinopathy in primary care clinics providing care to Aboriginal and Torres Strait Islander people.

Supporting independence and participation

The Independence and Participation Committee works to improve the ability of Australians who are blind or vision impaired to participate in the community. Key advocacy priorities focused on the National Disability Insurance Scheme (NDIS), aged care and meaningful employment for people with disability.

Highlights

- Roundtable convened in July 2017 to begin development of referral pathways to low vision services from the eye health sector.
- Position statement on *Meaningful employment for people with a disability in the Australian Public Service*, submitted to the Australian Public Service Commissioner in October 2017 and promoted through a Parliamentary Friends Group Dinner in February 2018.
- Position statement on *Meeting the needs of people who are blind or vision impaired within the aged care system*, submitted to the Minister for Senior Australians and Aged Care in November 2017.

Close the gap for vision

The Aboriginal and Torres Strait Islander Committee advocates for equitable eye health and vision care for Aboriginal and Torres Strait Islander people.

Highlights

- A sector roundtable to progress detailed work on resourcing and requirements for coordination across Aboriginal and Torres Strait Islander services.
- Ministerial roundtable 1 December 2017 to develop an agreed position on priority focus areas with the view of having a five-year plan that will make a tangible difference for the eye health and vision care of Indigenous Australians. Vision 2020 Australia is leading the collaborative development of the plan.
- Submission to the *Closing the gap refresh Discussion Paper*, led by the Department of Prime Minister and Cabinet, in March 2018.

Improving eye health in our region

The Global Committee continued to work in partnership with the International Agency for the Prevention of Blindness on priorities in the *Global Action Plan for Universal Eye Health*.

Highlights

- Submission to *Australia's Voluntary National Review on progress with the Sustainable Development Goals*, February 2018.
- Submission to the *Senate Standing Committee on Foreign Affairs, Defence and Trade's Inquiry into the United Nations Sustainable Development Goals*, March 2018.
- Submission to the *Joint Standing Committee on Foreign Affairs, Defence and Trade Inquiry into the strategic effectiveness and outcomes of Australia's aid program in the Indo-Pacific and its role in supporting our regional interests*, June 2018.

Auditors report

Vision 2020 The Right to Sight Australia

ABN 34 094 070 014

Report of the Independent Auditor on the Summary Financial Statements

For the Year Ended 30 June 2018

Report on the summarised financial report

The accompanying summary financial statements, which comprises the Statement of Profit and Loss and Other Comprehensive Income and Statement of Financial Position as at 30 June 2018, are derived from the audited financial report of Vision 2020 The Right to Sight Australia for the year ended 30 June 2018. We expressed an unmodified audit opinion on that financial report in our report dated 11 September 2018. That financial report, and the summary financial statements, do not reflect the effects of events that occurred subsequent to the date of our report on that financial report.

The summary financial statements do not contain all the disclosures required by Australian Accounting Standards – Reduced Disclosure Requirements (including the Australian Accounting Interpretations) and the Australian Charities and Not-for-profits Commission Act 2012. Reading the summary financial statements, therefore, is not a substitute for reading the audited financial report of Vision 2020 The Right to Sight Australia. The information reported in the summarised financial report is consistent with the annual statutory financial report from which it is derived and upon which we expressed an unmodified audit opinion in our report to the members. For a better understanding of the scope of our audit, this report should be read in conjunction with our audit report on the annual statutory financial report.

Directors' Responsibility for the Summary Financial Statements

The directors are responsible for the preparation of a summary of the audited financial report to meet the needs of users.

Auditor's Responsibility

Our responsibility is to express an opinion on the summary financial statements based on our procedures, which were conducted in accordance with Auditing Standard ASA 810 *Engagements to Report on Summary Financial Statements*.

Opinion

In our opinion, the summary financial statements derived from the audited financial report of Vision 2020 The Right to Sight Australia for the year ended 30 June 2018 are consistent, in all material respects with the audited financial report.
